*** Replication information for Gender differences in the choice of Major***
Danila Serra and Catherine Porter

Use dataset PorterSerraAEJ.dta
All the variables in the dataset are labeled.
Use the do file "PorterSerradofiles.do".
Commands are commented and follow the ordering of the tables in the paper, so all
should be self-explanatory.
Survey refers to the in-class survey so variables are self reported.
All other data are administrative data received from SMU.
